If you have some sort of flap inside your fuel tank mouth the pump may sense that the tank is already full or the back splash guard may be keeping the nozzle from fully inserting into the tank causing the same ...*

*Ford F250 P0446: EVAP Vent Control Circuit ? Malfunction ...
The fuel lines carry the fuel from the tank to the motor with the help of the pump. The chance of these failing is pretty slim, but with enough road salt and rust they'll begin to go eventually. Luckily a fuel line problem is pretty easy to spot; you'll be greeted by fuel spraying underneath the truck when there's a hole, or a severe lack of fuel being delivered if the line has been pinched.*

*SOLVED: I have a 2006 F250 which I have lots of - Fixya
Fuel Tank Venting. Your tank has to breathe. In order to breathe, your tank must have a vent somewhere that will relieve both vacuum and pressure. Gasoline expands in volume as it warms up and shrinks in volume as it cools down. The fuel level of your tank changes throughout the day, even if you are not driving it.*
