BMW 7 E65/E66 - Manuály - BMW

Continental has developed a Tire Pressure Monitoring System (TPMS) that works with wheel sensors and brake systems to alert the driver to low tire-pressure levels, via a dashboard warning light. This invaluable safety feature also helps reduce fuel consumption and CO2 emissions, and increases the length of your car's optimal performance lifespan.

ALPINA

Check your tire pressure either before you start your ride or the motorcycle has had a chance to sit for about 25 to 30 minutes. For accurate tire pressure readings always check pressure when the tire is cold, as heated tires can increase tire pressure. Buy yourself a high quality tire pressure gauge, not the cheap over the counter pocket kind.

21 E65 Tire Pressure Control - worker-front7-3.hipwee.com

2 Tire Pressure Control RDC Introduction RDC is an available option for the E65. The system monitors the tire inflation pressures, both when the vehicle is being driven and when it is stationary. An electronic transmitter module mounted inside each tire measures the tire pressure and temperature at regular intervals and transmits the information by radio frequency to the RDC control unit.
