Transcription Study Guide This study guide is a written version of the material you have seen presented in the transcription unit. The cell's DNA contains the instructions for carrying out the work of the cell. These instructions are used by the cell's protein-making machinery to create proteins. If the cell's DNA were

SECTION TRANSLATION 8.5 Study Guide

language. Translation occurs in cells too. Cells translate an RNA message into amino acids, the building blocks of proteins. But unlike people who use many different languages, all cells use the same genetic code. MAIN IDEA Amino acids are coded by mRNA base sequences. Translation is the process that converts, or translates, an mRNA message into a
