Cotton, F. A.; Wilkinson, G.; Murillo, C. A.; Bochmann M ...

Among college students, Cotton is perhaps best known as the coauthor of the textbook Advanced Inorganic Chemistry, now in its sixth English edition. Coauthored with his thesis advisor, Sir Geoffrey Wilkinson, and now with coauthors Carlos Murillo and Manfred Bochmann, the textbook is colloquially known as "Cotton and Wilkinson." The text surveys coordination chemistry, cluster chemistry, homogeneous catalysis, and organometallic chemistry.

For more than a quarter century, Cotton and Wilkinson's Advanced Inorganic Chemistry has been the source that students and professional chemists have turned to for the background needed to understand current research literature in inorganic chemistry and aspects of organometallic chemistry. Like its predecessors, this updated Sixth Edition is organized around the periodic table of elements and provides a systematic treatment of the chemistry of all chemical elements and their compounds.

[web.uni-plovdiv.bg](http://web.uni-plovdiv.bg)

In contrast with other typical textbooks, Cotton-Wilkinson 's Advanced Inorganic Chemistry is organized by elements, describing all the typical compounds for each element, going through bonding and reactivity. This arrangement makes it the absolute best book for just picking it up and starting to get into the inorganic chemistry of one element you are particularly interested in.
