Home - Ages and Stages

Ages and stages. Depending upon the age of your child, his learning style and personality, your child will have different needs. The first five years are especially crucial for physical, intellectual, and emotional development. Keep your child's personality and age in mind when looking for child care experiences and activities.

Ages & Stages

At this age, a child's brain is still developing the ability to judge distances and the speed at which a vehicle are travelling. And children develop differently. Knowing this will help parents and carers make decisions about what a child who's becoming increasingly independent can and can't do safely on their own.
