Pleasurecraft Starters & Alternators - Go2marine  
An alternator adjuster arm is normally just a piece of plate steel that connects to the engine on one end and the alternator on the other. Its purpose is to keep tension on the alternator belt. The steel arm is normally slotted, as can be seen below, and the bolt clamps the alternator's adjusting arm.

I have this exact alternator on a '99 Mastercraft ProStar 205v. The engine is a mercruiser 5.7L. The engine starts and runs fine but after a few minutes the engine will not turn off using the ignition switch. I've tested the relay connected to the purple/red stripe wire and it works great. I'm greatly appreciated.

TeamTalk - The Official Online MasterCraft Owner's Forum  
This new serpentine belt, 12V, 95-amp alternator is U.S. Coast Guard Approved and has the official "Marine Certified" UL 1120/SAE J1170 case. This is the exact same GM marine alternator that MerCruiser, Indmar, Marine Power, etc., use on their marine engines.

To check an alternator, pop your vehicle's hood and hook up a voltmeter to the car's battery by connecting the red lead to the positive terminal and the black lead to the negative terminal. Make sure the voltmeter reads at least 12.2 volts, then start your car and rev the engine to 2,000 RPM. Running and check the voltmeter again.
