For 387 Series access point running ArubaOS only: Aruba controller provisioned on the network Layer 2/3 network connectivity to your access point One of the following network services: Aruba Discovery Protocol (ADP) DNS server with an “A” record You need a proper Allen wrench (8mm) to open the cover of the USB Console port.

ArubaOS 8.2 Series - Part 1 - Mobility Master - YouTube

Great article, thanks for the info. I have 2 controllers with 8.3 and need to do the same redundancy mentioned here. Just one quick question though, if I have some access points already configured on one controller with it's ip address (like 10.201.201.11 – no redundancy setup yet), will they lose connection through the VRRP setup process?

Aruba Support Portal

ArubaOS Quick Start Guide and ArubaOS User Guide. Identifying Specific Installation Locations The 303H Series access point must be secured to an Aruba-approved wall or to a desk mount kit. This access point should be oriented vertically, with Ethernet ports facing downward to facilitate maximum antenna gain. Page 7: Installing The Access Point
