Thus, bandit algorithms are good candidates to efficiently discover the optimal assignment of content to a web page. Here we present an approach to layout optimization using ban-dit methodology. We name our approach multivariate bandits to distinguish from combinatorial bandits which are used to optimize subset selection.

Bandit Algorithms for Website Optimization - John Myles ...

Most readers of this blog would be familiar with A/B Testing. Just as a quick reminder, A/B testing is an experiment where a random visitor to your digital property is shown a different version than the original (also called ' control ') in an optimizer ' s quest to discover an optimal version that maximizes conversions. For example, maybe it ' s the red button that maximized clicks or maybe ...
