It's disappointing that there's no convenient menu that lets you just browse freebies. Instead, you have to search for your preferred genre, plus the word 'free' (free science fiction, or free history, for example). It works well enough once you know about it, but it's not immediately obvious.

Modern Physics is a funny concept. What Physicists consider to be modern consists of discoveries that in some instances happened just over a century ago. In this view what makes these topics and discoveries modern is not their relative age, but rather the conceptual shift from the Physics that has dominated the scientific worldview since at least the time of Galileo.
