catalogues

The catalogue of accepted products is available on the PADSnet website. PADS (Parts and Drawings System) is owned by SERCO and the data is managed by Network Rail. This includes the creation and revision of PADS numbers. There are more than 85,000 products accepted for use on our infrastructure.

Standards catalogue - RSSB

This compilation of UK Network Rail Standards addresses multiple operational and design subjects to secure the safe and efficient operation of rail infrastructure. With the exception of Guidance Notes, these standards are mandatory and contain specific information dictating design, construction, safety and security.

Product acceptance - Network Rail

We are encouraging contractors, suppliers and stakeholders to propose changes to our standards. Standards are the detailed requirements that underpin how the railway and the delivery of improvement projects are run. The changes are to encourage greater innovation, cost efficiency and third party funding into the rail network, whilst maintaining safety.

Standards Catalogue - RSSB

Rail Industry Standards (RISs) define functional or technical requirements to be met in circumstances where the management of the railway system does not need a Railway Group Standard (RGS). RISs are railway-specific standards: they contain requirements applicable to subsystems, or they set out rules about how subsystems should be operated or managed.

Catalogue of Network Rail Standards

Challenging Network Rail Standards The aim of Network Rail's standards is to achieve a safe, high performing and cost efficient railway system. We know, however, that they are often seen as overly complex and adding unnecessary cost. Our Transformation Plan and response to the Hansford Review identified opportunities to
