Weapons of the Middle Ages: the Medieval Catapult ...

The catapult eventually evolved into the hinged counter-weight trebuchet, a siege engine that had much greater accuracy and range, as well as a higher trajectory than the catapult. Whilst the trebuchet dominated the European battlefield for several centuries, it soon became obsolete in China due to the introduction of gunpowder weapons.

The History of the Catapult - Storm The Castle

Catapult history dates back to 300 BC, but the most advanced catapults were created by the Greeks and the Romans. The sheer power of these siege weapons struck fear in the hearts of many enemies. In medieval times, countries were constantly waging wars against one another, trying to establish their dominance.

Catapult A History Weapons In History

Roman artillery weapons were instrumental in the successes of the Roman army over centuries and were especially used in siege warfare, both for offence and defence. Principally used in fixed positions or onboard ships, these machines, known generally as ballistae, could fire bolts or heavy stones over several hundred metres to punch holes in enemy fortifications, batter ships, and cause ...

Catapult A History Weapons In

Catapult, mechanism for forcefully propelling stones, spears, or other projectiles, in use mainly as a military weapon since ancient times. The ancient Greeks and Romans used a heavy crossbowlike weapon known as a ballista to shoot arrows and darts as well as stones at enemy soldiers. The term catapult too can refer to these weapons, but more often it designates a larger engine that is used to ...

Catapult - Wikipedia

When Did the Romans Start to Use the Catapult? When the Romans first started using this type of weapon isn't known with certainty. It may have begun after the Wars with Pyrrhus (280-275 B.C.), during which the Romans had an opportunity to observe and copy Greek techniques. Valérie Benvenuti argues that the inclusion of towers within Roman-built city walls from about 273 B.C. suggests that ...
