Chapter 23 The evolution of Population Flashcards | Quizlet
Chapter 23: The Evolution of Populations. disasters such as earthquakes, floods, droughts, and fires reduce the size of a population drastically, and the new population may not be representative of the original population. Often times by change certain alleles become over represented while others become under represented ,...

Evolution - Evolution: Chapter 23 - Wattpad
Chapter 23 The Evolution of Populations. 55) In a hypothetical population ' s gene pool, an autosomal gene, which had previously been fixed, undergoes a mutation that introduces a new allele, one inherited according to incomplete dominance. Natural selection then causes stabilizing selection at this locus.
