*Control in Generative  
Grammar: A Research  
Companion. The subject of  
nonfinite clauses is often  
missing, and yet is  
understood to refer to some  
linguistic or contextual  
referent (e.g. Bill  
preferred \_\_ to remain  
silent is understood as  
"Bill preferred that he  
himself would remain  
silent"). This dependency is  
the subject matter of  
control theory.*

*Control is one of the  
earliest concerns of  
generative grammar. Key  
puzzles are already noted in  
Chomsky 1965, and one of the  
first dissertations in the  
field, Rosenbaum 1967  
(originally 1965), is  
largely dedicated to the  
topic. Theories of control  
figure prominently in every  
major school of thought in*

*Generative grammars:*

*Generative grammar systems use a predefined grammar to specify the way the output is to be generated. The grammar is specified as a set of production rules. For example, Rumelhart (Rowe & Patridge, 1993; Rumelhart, 1975) used the following for a story grammar: Story ? setting, episode. Setting ? time, place, characters*

*Control in Generative  
Grammar A Research Companion*  
Generative grammar is a  
linguistic theory that  
regards linguistics as the  
study of a hypothesised  
innate grammatical  
structure. A sociobiological  
modification of  
structuralist theories,  
especially glossematics,  
generative grammar considers  
grammar as a system of rules  
that generates exactly those  
combinations of words that  
form grammatical sentences  
in a given language.
