Depreciation Problems and Answers | Accounting Education

Depreciation means the decrease in the value of physical properties or assets with the passage of time and use. It is the non-cash method of representing the reduction in value of a tangible asset. Specifically, it is an accounting concept that sets an annual deduction considering the factor of time and use on an asset's value.

Problems and Solutions | Depreciation Accounting | CA CPT | CS & CMA | Class 11 | Class 12

The straight-line method of depreciation attempts to allocate equal portion of depreciable cost to each period of the asset's useful life. This method assumes that the depreciation is a function of the passage of time rather than the actual productive use of the asset. Under this method, the depreciation expense for a period is calculated by dividing the [...]
