### Understanding the Economic Value of Equity (EVE)

For example, if your company's net profit is \$200,000 per year, and you use 5 as the multiple, then you calculate your company's value as  $5 \times \$200,000 = \$1,000,000$ . From the buyer's perspective, provided the business continues to realize the same annual profits, they will earn \$200,000 per year for the \$1,000,000 investment, which is a 20% return.
