Ecosystems and Human Well-Being: Current State and Trends

In this chapter, Cagan H. Sekercioglu recapitulates natural ecosystem functions and services. Ecosystem services are the set of ecosystem functions that are useful to humans. These services include provisioning of food and fiber, regulating climate and air quality, supporting life, and providing cultural and aesthetic benefits. Ecosystems are essential for human well-being by supplying and purifying the air we breathe and the water we drink. Water, carbon, nitrogen, phosphorus, and sulfur are the major global biogeochemical cycles.
