About Engine Alliance: Pratt & Whitney and General Electric
Engine Alliance was established in August 1996 to develop, manufacture, sell, and support a family of aircraft engines for new high-capacity, long-range aircraft. The main application for such an engine, the GP7100, was originally for the Boeing 747 -500/600X projects, before these were cancelled due to lack of demand from airlines.

Home - Engine Alliance
With Engine Alliance, Pratt & Whitney and General Electric have partnered to take the GP7200 to new heights. Learn more about the people behind it.

Engine Gp 7200
Quietest, Greenest Engine for the A380. The GP7200 delivers a whisper-quiet flying experience at 17.6 dB under Stage 4 and emissions under CAEP/8. Your A380 will be noticeably quieter at 0.8 dB better than the competing engine — and save the environment 1,900 metric tonnes of CO2 every year.

GP7000 - MTU Aero Engines
After more than a decade building the GP7200, Engine Alliance announced a bold new strategy. They would shift their focus from producing the GP7200 to supporting it. The change would offer impressive benefits to EA customers – Engine Alliance's global network of field service engineers and overhaul shops would now be center stage.

THE A380 AND THE GP7200: MAKING THE ... - Engine Alliance
The Engine Alliance GP7200 turbofan on the Air France A380 that diverted to Goose Bay on September 30 shed its front cowling and fan disc. The U.S. Federal Aviation Administration on Thursday..

Air France Flight AF66 Suffers Engine Failure over Greenland
The intense competition between the two engines for the A 380, is centred around fuel efficiency. The GP7200 is generally thought to have a 1% advantage. It also seems to be the strategy for the U.S. engine makers to constantly maintain this performance gap over their competitor as each tries to improve performance.
