Solution

The moments of inertia of two gears that can turn freely on their pin supports are $I_A = 0.002 \text{ kg-m}^2$ and $I_B = 0.006 \text{ kg-m}^2$. The gears are at rest when a constant couple $M = 2 \text{ N-m}$ is applied to gear B. Neglecting friction, use the principle of work and energy to determine the angular velocities of
