Essential Docker for ASP.NET Core MVC - Free ASP.NET ...

In this article, I'll demonstrate how to create an ASP.NET Core Angular single-page application using the .NET Core CLI, create a Docker image, and run it as a container. The entire process is just 4 steps, each of which takes about a minute to perform—although creating the Docker image takes a couple minutes to complete.

Essential Docker for ASP.NET Core MVC | Adam Freeman | Apress

The docker run command is where we pick up the networking story. The most basic execution of an ASP.NET Core container looks something like this: `docker run -p 32767:80 imagetorun -p 32767:80` is what's called a port mapping. It maps port 80 on the container to port 32767 on the host. The host is the machine running Docker.
