Essential Guide to Blood Groups - Geoff Daniels, Imelda ...

Blood types are inherited and represent contributions from both parents. A total of 36 human blood group systems and 346 antigens are now recognized by the International Society of Blood Transfusion (ISBT). [2] The two most important blood group systems are ABO and Rh; they determine someone's blood type (A, B, AB and O, with +, ? or null denoting Rh status) for suitability in blood transfusion.
