### **Integrated Library System (ILS) - Cloud Based Library ...**

An integrated library system, also known as a library management system, is an enterprise resource planning system for a library, used to track items owned, orders made, bills paid, and patrons who have borrowed. An ILS usually comprises a relational database, software to interact with that database, and two graphical user interfaces. Most ILSes separate software functions into discrete programs called modules, each of them integrated with a unified interface. Examples of modules might include:
