What is Fluid Restriction? | Shirley Ryan AbilityLab
A fluid-restriction diet limits your daily intake of liquids, as well as foods that contain a high volume of fluid. The purpose of a fluid-restriction diet is to prevent the buildup of fluid in your body, a condition that's called edema. Your doctor may prescribe a fluid-restriction diet if you have end-stage renal disease or are on dialysis.

Your Heart Failure and Fluid Restriction
Fluid control for those on hemodialysis. Fluid restriction can help you feel comfortable before, during and after your dialysis sessions. Even though dialysis gets rid of excess fluid and waste in the body, it's not as effective as healthy kidneys that work 24 hours a day, seven days a week.
