all that we have covered? Take up the quiz below designed to test your knowledge. Ensure that you check your notes for what you fail.

What are forces and motion - Answers

Forces are at work all around us and act in pairs against one another. Forces make things move and make them stop. Some forces are very strong, and some are so weak you can't feel them at all. Friction is the force that causes moving things to slow down. Gravity is the force that makes things fall to the ground instead of falling up or sideways.
