How to grow Kangkong Plant in a Hydroponics Garden

Hydroponics is a form of gardening that uses no soil, but instead grows plants in a solution of water and nutrients. A hydroponic system can grow plants and vegetables faster and year-round. Plants grown this way usually yield more, require less space, and conserve soil and water.

Cannabis Growing - Hydroponics V. Soil Overview

Aeroponics is the process of growing plants in an air or mist environment without the use of soil or an aggregate medium. The word "aeroponic" is derived from the Greek meanings of aer (???, "air") and ponos (?????, "labour"). Aeroponic culture differs from both conventional hydroponics, aquaponics, and in-vitro (plant tissue culture) growing.
