guided discovery lesson plan | Lesson Plan | Cognitive Science

Guided Discovery addresses some of the drawbacks associated with both deductive and inductive instruction as it is essentially learner-centered. The teacher becomes a facilitator, who guides learners in the right direction so as to avoid misunderstandings of the rules. It makes learning memorable since learners are actively involved in the process.

themselves.

Guided Discovery Model - Instructional Models
Guided discovery requires teachers to plan activities and questions that will nudge their students towards the key points of the lesson. For example, I may not explicitly teach my students about comparatives, but through the guided discovery activities and tasks I've planned, my students will work with comparatives and pick up on the rules and patterns.
