How Super Cool Stuff Works by DK - Penguin Books Australia

All the best stuff from HowStuffWorks HowStuffWorks got its start in 1998 at a college professor's kitchen table. From there, we quickly grew into an award-winning source of unbiased, reliable, easy-to-understand answers and explanations of how the world actually works.

Electrodynamic Suspension (EDS) | HowStuffWorks

The air cooled as it passed across the cold pipes, and since cool air can't carry as much moisture as warm air, the process reduced the humidity in the plant and stabilized the moisture content of the paper.

Tech | HowStuffWorks

One potential drawback in using the EDS system is that maglev trains must roll on rubber tires until they reach a liftoff speed of about 93 mph (150 kph). Japanese engineers say the wheels are an advantage if a power failure caused a shutdown of the system.

How Cool Stuff Works - Ebook PDF - Google

With Gabe Doran, Mike Senese, David Heber, Jimmie Oxley. HowStuffWorks is about the stuff that makes the world go 'round. It's truly incredible to see the ingenious lengths people go to in order to extract rubber and iron, corn and wheat, and water and salt from the earth. Each chapter covers a different number of different and varied products that can be derived from something so fundamental.

Cool Stuff and how it Works - Chris Woodford, Luke Collins ...

In an emergency, of course, things can get a lot more hectic. All airline pilots have extensive training in dealing with the unexpected and keeping a cool head in precarious situations. Fortunately, it is only on rare occasions that pilots have to put this training to work, but they must be ready for action at all times.
