DylanSchneiderMusic – YouTube
Loud sounds can elevate our stress levels, create imbalances in our nervous system, lower our immunity and in extreme cases, cause hearing loss. When we are stressed, our whole relationship to sound changes, and regular everyday sounds can become magnified and contribute to the feedback cycle of the stress, amplifying it even more.

In this short video, we describe a distinct sound a starter will make that will let you know 100% that it is bad.

What You Need To Know About Sound Healing – mindbodygreen
It is very easy to overcook the subwoofer level, and although it may sound impressive, this quickly becomes tiring and leads to bass-light mixes, so take your time and listen critically. If the deepest and highest bass notes seem right, but it all goes wrong in the crossover region, try adjusting the crossover frequency up or down slightly to find the smoothest transition.

How English sounds to non-English speakers
Now here's the thing: All audio work is about manipulating sound waves. The end result of your work is this series of high and low pressure zones. That's why it's so important to understand how they work – they are the "material" of your art.

Sound design: how sound helps tell your visual stories ...
"How Soon Is Now?" is a song by the English rock band the Smiths, written by singer Morrissey and guitarist Johnny Marr. Originally a B-side of the 1984 single "William, It Was Really Nothing", "How Soon Is Now?"was subsequently featured on the compilation album Hatful of Hollow and on US, Canadian, Australian, and Warner UK editions of Meat Is Murder. ...
