Model A Ford Garage ~ Model A Electrical Wiring Diagram

Hot-wiring is the process of bypassing a motor vehicle's ignition switch and thus starting it without the key.It is often utilized during a vehicle theft.However, a legitimate vehicle owner who has lost their vehicle key or starting a vehicle with inoperable ignition switch (e.g. in run-down old cars) may also implement this process.. Methods

How To Hotwire Ford Expedition

A Mass Airflow -- MAF -- Sensor in a modern Ford vehicle is located inside the air intake duct. It uses a hot wire element to measure the amount of air entering the engine. The element is cooled

as air passes over it, and this information is converted into an electronic pulse to be relayed to the on-board computer, which can then calculate fuel injection functions.
