This test is designed for the software quality assurance professional to measure his proficiency in the use of the Mercury/HP Interactive LoadRunner 8.x product for measuring and predicting system behavior and performance.

Using IKM testing

About the IKM test. The IKM test adapts to your ability. If you're doing well, you will receive harder questions. If you're doing less well, the questions will get easier. After a while the test finds your level, and by the end you will almost certainly consider that the test has been difficult.
