Everyone knows that Adobe has been building many of their InDesign panels in Flash in CS4 and CS5, and that they are encouraging developers to use Flash as their basic method for creating user interfaces (UI). But I didn't quite realize that this implies that any SWF you create can become its own InDesign panel.*

When you use InDesign all day long, little things can really add up. When everything is working the way it should, and you're cranking out pages, you may get that great feeling of flow, like you're in the zone. Part of achieving that flow is getting your workspace set up just right, with the panels you need right where you want them.

InDesign Tutorial: Working with InDesign panels

(Panels are automatically collapsed to icons when added to an icon dock.) To move a panel icon (or panel icon group), drag the icon. You can drag panel icons up and down in the dock, into other docks (where they appear in the panel style of that dock), or outside the dock (where they appear as floating icons).
