*Solution 2.1 First we prove the distributive law when the first vector is of unit length, i.e.,  $n \cdot (b+c) = n \cdot b + n \cdot c$ . (2.1) From Figure 2.12 we see that the projection of the vector  $b+c$  onto  $n$  is equal to the sum of the projections  $b \cdot n$  and  $c \cdot n$ . Now we extend the result to the case when the first vector has arbitrary*
