Mathematics 490 – Introduction to Topology Winter 2007 Example 1.1.4. Suppose f and g are functions in a space $X = \{f : [0,1] \rightarrow \mathbb{R}\}$. Does $d(f,g) = \max|f - g|$ define a metric? Again, in order to check that $d(f,g)$ is a metric, we must check that this function satisfies the above criteria.

This text has a thorough introduction to topology, especially as it is related to analysis. With several exercises (complete with solutions for the Dover edition), this text provides good practice and forces the reader to work out some of the main ideas. However, as stated in the book's preface it is lacking in examples.
