---- introduction Increasing attention has been focused on the environment as a public policy issue. In addressing that issue, public officials are faced with the question: how can government be more effective in managing the environment? For many years, federal, state and local governments have reorganized themselves and used various management techniques for addressing environmental prob- lems. Since 1969, however, dramatic organizational and legislative actions have occurred in response ...

Introduction To Genetic Ysis 10th
Molecular or genetic classification: This is based on the degree of genetic relatedness of different organisms. Since all properties are ultimately based on the genes present, this classification is said to be the most natural or fundamental method. DNA relatedness can be tested by studying the nucleotide sequences of DNA and by DNA hybridisation or recombination methods. The nucleotide base composition and base ratio (adenine-thymine: guanine-cytosine ratio) varies widely among different ...
