Other potential cataract surgery complications are minor and may include: Swelling of the cornea or retina. Increased pressure in the eye (ocular hypertension). Droopy eyelid (ptosis).

Preventing & Managing Post-Surgical Ptosis

One of the most common cataract surgery complications is known as posterior capsule opacity (PCO). PCO occurs in roughly 20 percent of patients and involves the posterior capsule to become hazy....

Brown McLean Syndrome - EyeWiki

Cataract surgery successfully restores vision in the majority of people who have the procedure. People who've had cataract surgery may develop a secondary cataract. The medical term for this common complication is known as posterior capsule opacification (PCO). This happens when the back of the lens capsule — the part of the lens that wasn't removed during surgery and that now supports the lens implant — becomes cloudy and impairs your vision.

Cataract Surgery Complications - AllAboutVision.com

A few years later, Dr. Jaffe wrote a book entitled "Cataract Surgery and Its Complications," published by C.V. Mosby in 1972. The book was to be used by other ophthalmic surgeons, and it quickly became one of the most popular books on cataract surgery in publication, not just in the U.S., but all over the world.
