Barnes, Objects First with Java: A Practical Introduction ...

Handling objects in a list is not really different in any way from the previous experience we have with lists. The essential difference is only to define the type for the stored elements when you create the list. In the example below we first create a list meant for storing Person type object, after which we add persons to it.

Barnes & Kolling, Objects First with Java: A Practical ...

Teaching Java Objects First with BlueJ Abstract The traditional way to teach computer languages such as C, C++ is to start with a simple program Hello, world! . Java derives much of its syntax from C and C++ but has a simpler object model and fewer low-level facilities. But Java uses the object-oriented programming methodology.
