In my app where I use firebase, firebase-ui, google maps, among others, it worked perfectly. I want to update to the latest version of each library and install Firestore Performance.

Firestore Pricing | Firestore

Most apps need to know the identity of a user. Knowing a user's identity allows an app to securely save user data in the cloud and provide the same personalized experience across all of the user's devices. Authentication provides backend services, easy-to-use SDKs, and ready-made UI libraries to authenticate users to your app.
