Setting Ignition Points

Many standard DOHC Nissan engines featured Variable Valve Timing, such as the VG30DETT, and as such do not use the "V" designation. "V" designation is only if the engine has variable valve lift. A good example of an engine where not all of the feature designation spots are used is the L28ET engine. The two features listed are electronic port ...

It is Engine. I am working under a distributor. An Engine model: KA20DE 5 Speeds MT non turbo Engine start test finished. Compression, the pressure test are OK, too. The thing of the image is all⊘ There is no check lamp lighting. Oil pans are broken and are missing, and there is no damage. There is not the conspicuous oil leak, too.

List of Nissan engines: Gasoline (Petrol) and Diesel

I used to set my points at exactly .018", but they didn't last long, and once I had to stop by the side of the road and file and reset them to get the engine running. Now I set them at .019". All engines are different, so you have to look for signs that your points are out of adjustment before you decide where your best setting is.

Nissan KA24DE Engine | Turbo, specs, performance upgrades

The KA engines were a series of four-stroke inline-four gasoline piston engines manufactured by Nissan, which were offered in 2.0 and 2.4 L. The engines blocks were made of cast-iron, while the cylinder heads were made of aluminum. Despite their large capacity, this motor was not equipped with balance shafts.

Honda K20 and K24 Engine Specs - HCDMAG.COM

KA24DE: Engine Basics and Specs. The KA24DE is a 2.4L inline four-cylinder engine that uses an iron cylinder block with an aluminum cylinder head. Part of the reason Nissan used an iron cylinder block was to save money. The engine was intended for use in light trucks and SUVs, so weight saving wasn't a significant concern.
