A new safety option module provides Safe Torque Off (STO) functionality via EtherNet/IP™ for the Allen-Bradley® PowerFlex® 755 and 755T AC drive families. Learn how networked STO and a single ...

### **New Module Provides Safe Torque Off Functionality via EtherNet/IP**

Safe Torque Off is a function that prevents the inverter from generating torque in the motor. It ensures that no torque generating energy continues to act on the motor and that the motor cannot be re-started until the STO is removed. What this means is that once the Safe Torque Off is activated the motor will not turn after it has come to a stop.
