scale are not numeric and they should be Symmetric and balanced so multiple questions responses can be combined on a common scale.

Division of Student Affairs // Marquette University

What is a Likert Scale vs. a Likert Item. A "Likert scale" is the sum of responses to several Likert items. These items are usually displayed with a visual aid, such as a series of radio buttons or a horizontal bar representing a simple scale. A "Likert item" is a statement that the respondent is asked to evaluate in a survey.
