LACERTA M-GEN v2 Stand-Alone AutoGuider

4) Remove the eyepiece from GuideScope and insert the SynGuider II stand-alone guiding camera with the barlow ending screwed in (you get 1.5x magnification with that). I use the 1,5x Barlow because 500mm GuideScope focal length is too small for my 1764mm primary scope for guiding.

StarAid Revolution stand-alone autoguider with polar ...

The NexGuide stand-alone autoguider enables automatic drive corrections even without a laptop. Ideal for astrophotography with a DSLR camera. The slim body of the NexGuide camera fits easily to any telescope and to any equatorial mount that has compatible autoguider input via an ST-4.

Lodestar Stand Alone Autoguider

Precision. The MGEN Autoguider not only uses a sensitive Chip with small Pixels (3.75µm at 6mm diagonal, 1280x960) but also a worldwide unique algorithm of unrivaled accuracy of 1/50 pixel for guiding. The new AI-algorithm of the MGEN-3 uses up to 100 Stars in the field at once, which even eliminates seeing effects for guiding.

Sky-Watcher SynGuider - stand-alone auto guider

The World's favourite autoguider is now even better! With its new Sony ICX829 Exview2 CCD, it offers twice the sensitivity of the original Lodestar, making guide stars even easier to find. In addition, the autoguider output socket is now a standard RJ12 connector and so overcomes any objections to the strength of the original Lodestar cable.

Latest News - Starlight Xpress Ltd

The LACERTA M-GEN v2 Stand-Alone Guider is a fully functioning, reliable and high sensitivity precision autoguider that will guide your telescope without a PC or laptop. The Lacerta MGEN is so sensitive and precise that it will give you 0.38" guiding precision even with a simple 50mm (9x50) finderscope converted into a guidescope.
