Jetting Mikuni VM + TM Carbs

The jet needle controls the fuel mixture in the mid range throttle position which is approximately 1/4 to 3/4 throttle opening. The taper of the needle determines the amount of fuel. For example: the thinner the diameter of the needle, the more fuel will be drawn through the needle jet.

JETS R US MIKUNI NEEDLE Jetsrus

Here's what Mikuni TM's typically are equipped with. The normal #5

series of standard Mikuni needles are suitable for the TM34, and the #6 series is good for the TM36 to TM38 non-pumper carbs. Listings of all the standard Mikuni needles: Jets R Us (but theirs aren't all genuine Mikuni needles). NicheCycle and Sudco also have needles.

NEEDLE JET

The Needle Jet and Jet Needle The needle jet and jet needle regulate fuel delivery throughout the mid-range. As mentioned above, the needle jet takes over most of the fuel delivery from the pilot circuit as the throttle is opened. Needle jets are available in an assortment of sizes for most of the Mikuni round-slide and flat-slide carburetors.

Mikuni TMR32 Needle jet removal - Testing out the carbs ...

As the needle jet is the only jet in the carburetor subject to wear it should at the top of the list for replacement at annual service intervals. A worn needle jet is so common that it led me to coin the phrase "It's the needle jet stupid." Again a word of caution: There are some ten odd people making aftermarket parts for Amal carburetors.
