BMC Molecular and Cell Biology | Home page
Cell biology is a branch of biology that studies the structure and function of the cell, also known as the basic unit of life. Cell biology encompasses both prokaryotic and eukaryotic cells and can be divided into many sub-topics which may include the study of cell metabolism, cell communication, cell cycle, and cell composition.

Molecular cell biology is a branch of biology which is a relatively new field compared to other fields of study. Scientists who study this field study the structure and properties of molecules found within cells. This field is often closely linked with biochemistry, in which the chemical reactions of biological molecules are looked
