Syncope: Practice Essentials, Background, Pathophysiology

Reye syndrome is a rapidly worsening brain disease. Symptoms may include vomiting, personality changes, confusion, seizures, and loss of consciousness. Even though liver toxicity typically occurs, jaundice usually does not. Death occurs in 20–40% of those affected and about a third of those who survive are left with a significant degree of brain damage.

Neuroleptic malignant syndrome (NMS) is a rare, but life-threatening, idiosyncratic reaction to neuroleptic medications that is characterized by fever, muscular rigidity, altered mental status, and autonomic dysfunction. The syndrome was first described by Delay and colleagues in 1960, in patients treated with high-potency antipsychotics.

Herpesviral encephalitis - Wikipedia

Syncope is defined as a transient, self-limited loss of consciousness with an inability to maintain postural tone that is followed by spontaneous recovery. This definition excludes seizures, coma, shock, or other states of altered consciousness.

Phenergan Injection - FDA prescribing information, side ...

Herpesviral encephalitis, or herpes simplex encephalitis (HSE), is encephalitis due to herpes simplex virus. It is estimated to affect at least 1 in 500,000 individuals per year, and some studies suggest an incidence rate of 5.9 cases per 100,000 live births. About 90% of cases of herpes encephalitis are caused by herpes simplex virus-1 (HSV-1), the same virus that causes cold sores. 57% of ...
