Lecture 11: Fractals and Dimension Prof. Emma Carberry Lecture notes by: Alan Dunn Note: the spaces considered in this lecture are all metric spaces. Fractals might appear at ?rst to be unrelated to our current studies. However, they are connected to dynamical systems in an interesting way: a number of dynamical systems have orbits that approach

Chaos and Fractals in Music - Holy Cross

In this he showed that dynamical systems can exhibit chaotic, seemingly random, behaviour. Many scientists think that this ranks as one of the main scientific advances of the twentieth century together with relativity and quantum theory. I will also talk about how the butterfly effect links chaos and the beautiful geometric objects, fractals.

Chaos & Fractals

The Chaos Fractal is one of the Fractals of the Mists and occurs at levels 13, 30, 38, 63, 88 and 98. The Chaos Fractal is not a single, complete story, but part of the start of a new arc that paralleled the main Season 3 plot.

Fractals, Chaos, and Music

Fractals: A fractal is a never-ending pattern. Fractals are infinitely complex patterns that are self-similar across different scales. They are created by repeating a simple process over and over in an ongoing feedback loop. Driven by recursion, fractals are images of dynamic systems – the pictures of Chaos.

In mathematics, a fractal is a subset of a Euclidean space for which the fractal dimension strictly exceeds the topological dimension.Fractals appear the same at different levels, as illustrated in successive magnifications of the Mandelbrot set; because of this, fractals are encountered ubiquitously in nature. Fractals exhibit similar patterns at increasingly small scales called self ...
