Desert Driving Tips - Off-Road Driving Techniques ...

A Snatch recovery differs from a normal tow recovery because the line connecting the two vehicles is not tensioned prior to the recovery as in a tow recovery. A Snatch recovery relies on the elastic properties of the strap to work properly. During a normal snatch recovery, the strap will elongate by around one meter or 3 feet.

Recover From Off Road Hassles While Going Off Road in Your ...

An electric winch that is meant for off-road recovery should never be used for hoisting. A hoist is designed differently. The biggest difference between the two is in the braking mechanisms. A hoist has a superior brake that keeps the load from dropping. Our winch has a dynamic brake that does not have as much braking power as a hoist.
