System Software two mark questions and answers – CS2304

The operating system is responsible for managing all the processes that are running on a computer and allocated each process a certain amount of time to use the processor. In addition, the operating system also allocates various other resources that processes will need such as computer memory or disks.

Operating System 2 Mark Question

2. Why is the Operating System viewed as a resource allocator & control program? A computer system has many resources - hardware & software that may be required to solve a problem, like CPU time, memory space, file- storage space, I/O devices & so on. The OS acts as a manager for these resources so it is viewed as a resource allocator.
