(PDF) PL/SQL User's Guide and Reference | MINAR AFRIDI ...
PL/SQL User-Defined Subtypes. A subtype is a subset of another data type, which is called its base type. A subtype has the same valid operations as its base type, but only a subset of its valid values. PL/SQL predefines several subtypes in package STANDARD. For example, PL/SQL predefines the subtypes CHARACTER and INTEGER as follows –

PL/SQL Developer 13.0 User's Guide

The standard way to print output from PL/SQL is using the package DBMS_OUTPUT. In order to use this package from Python use the following steps: Call the PL/SQL procedure DBMS_OUTPUT.ENABLE() to enable output to be buffered for the connection. Execute some PL/SQL procedure that puts text in the buffer by calling DBMS_OUTPUT.PUT_LINE().
