Digital signal processing (DSP) is the use of  
digital processing, such as by computers or  
more specialized digital signal processors,  
to perform a wide variety of signal  
processing operations. The signals processed  
in this manner are a sequence of numbers that  
represent samples of a continuous variable in  
a domain such as time, space, or frequency.  
...

## **Digital signal processing - Wikipedia**

Mathematical analysis is the branch of mathematics dealing with limits and related theories, such as differentiation, integration, measure, infinite series, and analytic functions.. These theories are usually studied in the context of real and complex numbers and functions. Analysis evolved from calculus, which involves the elementary concepts and techniques of analysis.
