Numerical Reasoning | Example Questions | SHL Direct

Some rarer forms of numerical reasoning tests have no time limit and/or negative scoring (incorrect answers subtract from your total score, rather than just scoring 0). In numerical reasoning tests, you will typically deal with graphs, tables, number sequences and text. These will contain the raw data needed to answer a written question, but you will often have to perform several operations on that data to arrive at the answer.

Numerical Reasoning Test
Numerical Reasoning. In a numerical reasoning test, you are required to answer questions using facts and figures presented in statistical tables. In each question you are usually given a number of options to choose from. Only one of the options is correct in each case. Test takers are usually permitted to use a rough sheet of paper and/or a calculator.
