higher and foundation tiers.

Ratio Formula in Maths Explained With Solved Example Questions

For example, older televisions have a 4:3
aspect ratio, which means that the width is
 $\frac{4}{3}$ of the height (this can also be expressed
as 1.33:1 or just 1.33 rounded to two decimal
places). More recent widescreen TVs have a
16:9 aspect ratio, or 1.78 rounded to two
decimal places.

MyMaths - Bringing maths alive - Home

However, we should keep the original
quantities in mind, even when using this
reduced ratio. There are not 3 total students
in the class, but 15. The reduced ratio just
compares the relationship between the number
of boys and girls. There are 2 boys for every
girl, not exactly 2 boys and 1 girl. Some
ratios cannot be reduced.

London to Sheffield. It took him 3 hours at an average speed of 80km/h. Lyn drove from London to Sheffield. She took 5 hours.

Ratios - mathsisfun.com

When we compare the relationship between two numbers dealing with a kind, then we use the ratio formula. It is denoted as a separation between the number with a colon (:).

Sometimes a division sign is also used to express ratios. For example, we are making a cake, then the recipe sometimes says to mix flour to water in the ratio 2 part 1.
